

WHY WE DO THE THINGS WE DO AT DARYL.

Daryl believes in using Biodynamic, Organic and Sustainable ingredients and wines whenever possible. We believe it's not only important to support local agriculture, but that food and wine produced in this way can lend tastes and textures that make the dining experience incredibly unique.

Sustainable agriculture refers to the ability of a farm to produce food indefinitely, without causing irreversible damage to ecosystem health. Two key issues are biophysical (the long-term effects of various practices on soil properties and processes essential for crop productivity) and socio-economic (the long-term ability of farmers to obtain inputs and manage resources such as labor).

Organic farming is a form of agriculture which avoids or largely excludes the use of synthetic fertilizers and pesticides, plant growth regulators, and livestock feed additives. As far as possible, organic farmers rely on crop rotation, crop residues, animal manures and mechanical cultivation to maintain soil productivity and tilth to supply plant nutrients, and to control weeds, insects and other pests.

Biodynamic agriculture, or **biodynamics** is an organic farming system (but predates the term). It is based on the anthroposophical teachings of Rudolf Steiner, particularly on the eight lectures given by him in 1924 at Schloss Koberwitz in what was then Silesia, Germany nowadays Poland (close to Wrocław). At the time Steiner believed that the introduction of chemical farming was a major problem. Steiner was convinced that the quality of food in his time was degraded, and he believed the source of the problem were artificial fertilizers and pesticides. However, he did not believe this was only because of the chemical or biological properties relating to the substances involved, but also due to spiritual shortcomings in the whole chemical approach to farming. Steiner considered the world and everything in it as simultaneously spiritual and material in nature, an approach termed monism. He also believed that living matter was different from dead matter, a viewpoint commonly referred to as vitalism.

The term *biodynamic* was coined by Steiner's adherents. Any biodynamic produce is also organic. A biodynamic farm works exactly the same as an organic farm in using no pesticides, herbicides etc., but there are various agricultural methods which are unique to biodynamic farming. These include field and compost preparations and the use of an astrological calendar to determine times of planting and harvesting. Biodynamic produce is certified by Demeter, but can be certified by an organic certifying body as well. A central aspect of biodynamics is that the farm as a whole is seen as an organism, and therefore should be a closed, self-nourishing system.

CORISON WINERY, NAPA

"I handcraft my two Napa Valley Cabernet Sauvignons, without compromise, from some of the finest vineyards in the Napa Valley- a region that I believe can make Cabernet as well, or better, than any other place in the world. These benchland vineyards are located between Rutherford and St. Helena, where deep, stony alluvial soils promote the ideal growing conditions for the Cabernet vine. These vines regularly produce some of the most concentrated and superbly ripened fruit anywhere. My winegrowing philosophy is to make complex wines that walk the fine line between power and elegance. My winemaking techniques are very traditional, using only small French oak barrels sourced from several forests for complexity. It is my job to let the vineyards speak."

- Cathy Corison

"The estate vines of **Kronos Vineyard** surround Corison Winery in its Victorian-style barn. As one of the oldest Cabernet Sauvignon Vineyards in the Napa Valley, Kronos Vineyard is a rare treasure. Growing on gravelly loam soils, the gnarly old veterans produce scant yields of wine of uncommon concentration and refinement. Juicy with black cherry and plum fruit enhanced with notes of violets and spice, Cathy's wines are noted for their consistency and impeccable balance. Powerful and elegant at the same time, her wines grace the table and are made to age."
